CLAIMS

What is claimed is:

 A method for delivering NO to the cells in a mammal, comprising administering low molecular weight nitrosating agent to the mammal.

2. A method for increasing the O_2 -delivery capacity of RBCs in a mammal, comprising administering low molecular weight nitrosating agent to the mammal.

3. A method for scavenging oxygen free radicals in a mammal, comprising administering low molecular weight nitrosating agent to the mammal.

4. A method for preserving a living organ, comprising incubating the organ in a solution of S-nitrosated hemoglobin and low molecular weight thiol.

5. A method for treating malaria in a patient, comprising the steps of:

a) isolating the patient's red blood cells;

b) treating the patient's red blood cells with Snatrosothiol; and

c) readministering to the patient the red blood cells.

6. A method for treating a disease or medical disorder in a mammal, comprising administering to the mammal a nitrosating agent.

25 7. The method of Claim of in which the nitrosating agent is selected for rapid entry into the target cell.

5

Sul 7
5

8. The method of Claim 6, wherein the disease or medical disorder is selected form the group consisting of: shock, angina, stroke, reperfusion injury, acute lung injury, sickle cell anemia and infection of the red blood cells.

SUB 1.

A preparation of SNO-Hb $[FeII]O_2$ which is S-nitrosylated without detectable oxidization of the heme Fe.

50/10

o. A method for making SNO-Hb[FeII]O₂, which is specifically 8-nitrosylated on thiol groups, comprising incubating excess nitrosating agent with purified hemoglobin in the presence of oxygen.

11. The method of Claim latin which the nitrosating agent is a low molecular weight S-nitrosothiol.

JUI 15

12. A preparation of SNO-Hb[FeII]O₂ which is S-nitrosylated without detectable oxidation of the heme Fe.

05/3

A method for making SNO-Hb[FeII], which is specifically S-nitrosylated on thiol groups, comprising incubating excess nitrosating agent with purified hemoglobin in the absence of oxygen.

20

14. The method of claim 12 in which the nitrosating agent is a low molecular weight S-nitrosothiol.

303 ml

A method for regulating delivery of oxygen and NO, in various redox forms, in a mammal, comprising administering to the mammal a mixture of a low molecular weight thiol or nitrosothiol and hemoglobin or S-nitrosohemoglobin, selected for the oxidation state of the heme iron and for the oxygenation state.

500

- 16. A method for delivering NO in a mammal, comprising administering to the mammal a blood substitute comprising S-nitrosohemoglobin.
- 17. The method of Claim 15, in which the blood substitute comprises S-nitrosohemoglobin and low molecular weight S-nitrosothiol.

- a mammal, comprising administering to the mammal a blood substitute comprising S-nitrosohemoglobin.
- 19. A method for reducing blood pressure in a mammal, comprising administering SNO-Hb to the mammal.

20

- 20. A method for treating a disease in a mammal, comprising administering a form of SNO-Hb to the mammal, wherein the disease is selected from the group consisting of heart disease, vascular disease, atherosclerosis, lung disease and inflammation.
- 21. A method for treating a medical condition in a mammal, comprising administering a form of SNO-Hb to the mammal, wherein the medical condition is selected from the group consisting of stroke, angina and acute respiratory distress.

- 22. A method for enhancing the preservation of an excised organ, comprising storing the organ in a solution comprising SNO-Hb/FeII) O_2 .
- 23. A method for treating a human with sickle cell anemia comprising administering to the human a preparation comprising SNO-Hb(FeII) O_2 .

- 24. The method of Claim 23 in which the preparation comprises SNO-Hb(FeII) O_2 and a thiol.
- 25. The method of Claim 23 in which the preparation comprises SNO-Hb(FeII) O_2 and an S-nitrosothiol.
- 5 26. A method for treating a patient having a disease or medical condition characterized by abnormalities of nitric oxide and oxygen metabolism, comprising administering to the patient an effective amount of a preparation comprising SNO-Hb.

,27. The method of Claim 26 in which the disease or medical condition is selected from the group consisting of: heart disease, lung disease, sickle-cell anemia, stroke or organ transplantation.
